SELVAA PARIMALAM

It's easy to get stuck in a routine, especially at work and even more so if one has been doing the same job for a while, taking on a new challenge is a great way of getting out of that rut. Taking chances is a great way to test oneself while pushing boundaries and stepping out of the comfort zone, thus, making it a critical component of peak performance because it provides stimulation. One such entrepreneur who has stepped out of her comfort zone to pursue her dreams is none other than Ms Selvaa Parimalam (Maya).

Established in 2009, A & B Scaffold Engineering Pte Ltd is a business that specialises in scaffold works such as the erection and dismantling of metal scaffolds. In addition, the company also designs and rents scaffold equipments to various construction and petrochemical companies. The company strives to support their clients by completing their work safely in a hindrance-free environment.

Having spent several years at a construction firm handling the sales and trading of building materials, Ms Maya decided to make the decision to leave her stable job to venture out on her own in scaffolding works. While venturing in a whole new industry, Ms Maya saw this as a great opportunity to fulfill her dream. Finally, her goal was realised and A & B Scaffold Engineering Pte Ltd was established. Ms Maya wanted to prove to others that a woman like her could also succeed in a male-dominated industry by working hard and having the determination.

Back in the days when Ms Maya first entered the industry, she grappled with the problems of having limited capital and as one of the females working in a "male-dominated" industry, she struggled with gaining the trust of her clients. However, through hard work and by emphasising greatly on quality of work, Ms Maya was able to overcome any sort of difficulty.

As an established scaffolding company in Singapore, the company has built its reputation on a heritage of delivering excellence through safe work procedure. As such, the company is being categorised Biz Safe Star level by WSH council in Singapore. The team at A & B Scaffold Engineering Pte Ltd ensures that quality work is being delivered by completing work on time or before schedule to meet or to exceed safety standards. Being renowned in its trade, A & B Scaffold Engineering Pte Ltd is able to obtain their projects through referrals and from its pool of satisfied customers as well as tender projects to various companies.

The foundation for productivity, efficiency and quality workmanship is the result of the company's dedicated team of workers. A & B Scaffold Engineering Pte Ltd is committed to provide skills training and upgrading programs for employees in order to excel in the industry.

Ms Maya has attributed the success of the company to her dedicated and loyal team who has given their very best in everything that they do. Looking ahead, A & B Scaffold Engineering Pte Ltd currently has plans to venture into the marine sector, as well as to expand into other countries in Southeast Asia.

A & B Scaffold has provided satisfied customers with:

1. Highest Safety and Health Standards
2. Uncompromising Quality of Excellence
3. Exemplary Productivity and Performance
4. Cost Effective Access Solutions
5. Service Reliability and Customer Satisfaction

It is at our top priority to ensure that the safety of end user and erector is ensured. Our objectives are aimed at "zero" accident rates at all times. A & B Scaffold has always been monitoring and complying towards all necessary regulations and standards set by the MOM.
